Notulae odonatologicae is a semi-annual companion publication to *Odonatologica*, published for the International Odonatological Foundation, Societas Internationalis Odonatologica (S.I.O.). It publishes minor original papers and short notes related to all aspects of odonatology: faunistics, taxonomy, book reviews, ethno-odonatology, etc. The *Notulae* are covered by most of the major abstracting services. It is general policy that submitted papers will be refereed by two members of the joint boards of *Odonatologica* and the *Notulae odonatologicae*.

Style and layout of the manuscripts should strictly follow the published examples. This also applies to literature citations and to lists of species and references. The publication of manuscripts not prepared in accordance with the *Notulae* style and layout will suffer from considerable delay.

Executive Editor

Asmus Schröter, Germany

Editorial Board (supplementary to the *Odonatologica* board)

Cornelio Andrés Bota-Sierra, Colombia

Jean-Pierre Boudot, France

Paweł Buczyński, Poland

Samuel Couteyen, La Réunion

Rory A. Dow, The Netherlands

Milen Marinov, New Zealand

K.A. Subramanian, India
